### Definition of Agricultural Burning

- **AGRICULTURE** (for the purpose of 310 CMR 7.07) means those practices involved with the cultivation of soil for purposes of crop production and/or the raising of livestock when such crops are produced primarily for commercial foodstuffs and such livestock are raised primarily for commercial foodstuffs or work purposes and consist of an area larger than one acre of land.
- DEP is willing to stretch its definition of agriculture to apply to nurseries. Nurseries would be limited to the same conditions and the same types of material to be burned as other agricultural sources and would need fire department approval.
- Agricultural open burning can occur all year long, with Fire Department approval, and does not have to be restricted to the January 15<sup>th</sup> through May 1<sup>st</sup> time-frame.
- DEP has determined that open burning permits, for the destruction of agriculturally generated material, be effective two hours after sunrise with the requirement that all fires be extinguished by 4:00 p.m. the same afternoon. Rochester Fire Department will allow agricultural burning between 8:00am, and 4:00pm.
